

LIFTS ALL

WHAT DO YOU WANT TO LIFT?

Lifts All is one of the world's leading manufacturers of lifting tools. Our wide product range supplies industries all over the globe with tailor-made ergonomic solutions. All of the lifts are operated with compressed air, which gives a low energy consumption and makes the lifts quite and safe. We lift all!

LIFTS ALL AB

We have many years experience of lifting equipment and have been creating unique lifting solutions since 1994. Lifts All have created over 4500 lifting solutions to our many customers all over the world. We have improved many companies work environment which has led to reduced work related injuries and wear and tear complications that are common when lifting manually.

Thanks to our great knowledge and experience of lifting equipment we are able to develop, customize and manufacture products – all under one roof. We of course also offer installation and life-long support and service.

What do you want to lift?

We have experience from all kinds of industries, such as the car-, pharmaceutical- and food industry and have lifted all kinds of objects through the years. No lifting object is too difficult for us! See some examples of our many lifting solutions from page 6.

How do we lift?

All our lifts are driven by compressed air, which makes it a safe and quiet lifting tool. All you need is our compressed air cylinder Bal-Trol, a compressor with pressure of 6-7 bar (80 psi) and a connecting tube. No electricity is needed!

WHY CHOOSE BAL-TROL?

It is safe and secure

- We guarantee that our lifting equipment lifts your desired load.
- We have great knowledge and expertise since 1994
- Our lifting equipment is CE-certified

It is ergonomic

- We can offer many different steering handle adjusted after your staff and needs.
- Our lifting equipment runs by weightless handling, which means almost no force is necessary by the operator.
- The lifting tools are customized after your work place to offer the best ergonomics possible

It is fast

- With our balancing technique the steering is intuitive, similar to manual handling but without the heavy load. This makes it easy and fast to use.
- The speed can be adjusted after you work pace
- On request we can give you an estimated capacity of your lifting problem. X lifts per minute.

It is green

- All vacuum lifters has an Energy Saving System that activates when lifting.
- Only compressed air is necessary, which creates no footprints on our planet.
- It is very durable and meet the car industries high demands of 99,7 %

Lift for doors, windows and boards

The lifting tools have a low building height and is ergonomically developed to improve the working environment for operators. On many grippers it is also possible to adjust the length and width of the gripping arms to be able to grip loads of all kinds of sizes.

Lift heigh with Manhattan

Manhattan is recommended when you need to lift heigh into shelves for an example when a fork lift is too ungainly. It is possible to lift rolls, boxes and cartons to mention a few.

It can be installed in an overhead crane system.

Lift for gas bottles

We can lift gas bottles of various sizes and shapes. They can be tailor-made after your needs. If vacuum cups are not optimal for you, then a simple hook or mechanical gripping can be the solution to your lifting problem. For some lifts it is also possible to choose a tilt function.

4740

Lift for cartons

Basic is an allround lift (see picture above), perfect for package- and distribution centers and warehouses where lift of boxes need to be quick and smooth. It quickly grips the carton box and can release in the air with a push of a button if necessary. Another advantage with Basic is that the load can be rotated endlessly.

You can choose between 1, 2 or 4 vacuum cups depending on the size of the carton box. Tilt function is optional.

If you are looking for another solution for lifting cartons we can tailor-make a lift for you!

4581

Lift for rolls

Lifts All's lifts for rolls can manage rolls of various sizes and materials: paper, plastic, steel band, cable, thread etc. They can be gripped with clamps, expander or with vacuum depending on the material and handling of the rolls.

Combi gripper

A combi gripper offers a great variety of solutions in one lifting tool - ideal for workplaces where different objects are being dealt with on a daily basis. In the base unit there is a compressed air driven vacuum pump, a vacuum meter and quick couplings which makes it very easy and quick to change an application. You can choose between different applications: hook, vacuum cup or magnet to mention a few. They can be changed within seconds, ready to lift something new!

Lift for steel with magnets

It can lift steel tubes, magnetic steel or iron objects. The lift's magnets can be adjusted depending on the size and weight of the load.

Lift for sacks

Our sack lift optimizes frequent handling of sacks in the food-, chemical- and pharmaceutical industry. The operator can quickly move the sacks from pallet to conveyor without any manual lifting.

For airtight sacks we recommend lifting with Basic or with Sack-Handler Vacuum that can grip the sack quickly. If it is necessary to rotate the load, we recommend using the Basic that has a rotatable joint. Sack-Handler Vacuum can be ordered in stainless steel.

For non-airtight sacks we recommend the Sack-Handler Mechanical that is very popular in the laundry industry when lifting and unloading of laundry sacks is necessary. It is also a great tool at post terminals. The Sack-Handler Mechanical consists of two rolls sealed with rubber that are joined together for a strong grip.

Lift for car parts

We can offer different kinds of lifts for tires and car parts.

Lift for breweries

We offer different kinds of lifts depending on what you need to lift. We have lifting tools for lifting beer barrels, cans, beer casks and crates with bottles among others. It is possible to lift with vacuum technique for an example or mechanically with a hook or gripping claws.

2488

4234

2335

Lift for drums

Lifts All's handy grippers optimizes the handling of drums and barrels in the food-, chemical- and pharmaceutical industry. The operator can quickly move the drum from point A to point B, without any effort.

You can choose a vacuum gripper to lift and empty plastic drums by turning them 180 degrees. It grips with vacuum cups on the side of the drum. We also have a lifting tool that grips the lid of a drum with vacuum or mechanically by gripping underneath the edge of the lid.
