TenActiv™

Cut-Resistant Composite Knit Glove with Grey PU Palms

#STAFGPU

These cut-resistant gloves are part of Superior Glove's bestselling product line: the TenActiv™ series, featuring gloves knit with high-tenacity composite yarns that are designed to meet a range of applications, all at a great price.

A variety of composite-knit yarns go into this line, some featuring high-strength composite filament fiber in the blend for unbeatable cut resistance and dexterity. High-strength composite filament fiber is incorporated in a way that it cannot come through to the hand for total comfort and extended glove life. All TenActiv™ gloves feature lint-free, continuous filament yarn that is stronger than steel on an equal-weight basis.

Polyurethane-coated styles offer a high coefficient of friction that is non-shedding, making them ideal for those working with circuit boards or any application where contamination is of concern.

TESTIMONIAL

Technical Glass Products
Safety Coordinator

"After a workplace injury occurred in our glass processing area, we decided to test drive these gloves. Our employee reviews were so positive we have now replaced all of our other gloves with these ones.

Thanks for making our workplace a much safer place!"

TENACTIV™

1950 grams of cut protection.

FEATURES

- High-strength CF* fiber; no itching or poking through the hand
- Lint-free, continuous filament yarn that is stronger than steel on an equal-weight basis
- Polyurethane-coating is non-shedding; ideal for applications where contamination is of concern

* Composite filament

APPLICATIONS

Handling Sharp Objects
Glass Plants
Construction
Automotive Industry
Aerospace Industry
Metal Fabrication
Metal Stamping
